

## Certificate of Conformance

Product Code & Name	AMC: Amikinos Adult Cat Chicken Reference
Product Batch No.	W-408491 (parent extrusion)
Date of Sampling	02-July-2017

Please find below the results of the diet sample as referenced above.

Parameter (Method reference)	Result	Theoretical <sup>(T)</sup> (Declared values) Min/Max tolerances	Notes / Guideline Tolerance
MACRO NUTRIENTS			
Moisture (NIR)	5.5 %	% ( %) Min = N/A Max = 8.00%	*
Oils (Crude) (NMR)	18.4 %	% ( %) Min = 16.63 % Max = 23.75%	*
Protein (Crude) (NIR)	50.4 %	% ( %) Min = 48.00 % Max = 57.00 %	*

Parameter (Method reference)	Result	Theoretical <sup>(T)</sup> (Declared values) Min/Max tolerances	Notes / Guideline Tolerance
Fibres (Crude) (NIR)	2.5 %	% ( %) Min =0.30 % Max = 3.70 %	*
Ash (Crude) (NIR)	10.5 %	% ( %) Min =8.31 % Max =10.69 %	*

Notes:

\* Result within guideline tolerance levels

(T) Theoretical figures are taken from our recipe formulation system which predicts the analysis results likely in theory. Natural variation in ingredients, seasonal and batch to batch variations will alter this figure along with any recipe updates. It is suggested these theoretical figures are reviewed at least annually with your nutritional advisor.

Please come back to us if we can be of any further help.

Yours,

Dr. Agnes K Buckley, MSc, PhD  
Laboratory Manager

The Certificate of Conformance (CoC) is a UK produced document after receiving the manufacturer's product analysis data. Where reference data is subcontracted to a third party laboratory, the testing is conducted in UK or home quality laboratories which are not UKAS accredited. Combined with the reference sampling protocol which does not meet formal sampling and analysis requirements (SPL) the CoC cannot be used to certify the product. The CoC is therefore only to be used for monitoring and as a guide to the overall quality. We assume no responsibility for the accuracy and the interpretation of the data unless agreed for interpretation of the test results.
